NEW STANDARD OF PRICES

OF THE DISTRICT.

CHICAGO, July 22 .- A special dispatch from Chattanooga, Tenn., says: Within the next three months the manufacturers of the south are to feel the grasp of the biggest coal combine ever formed. It is to emrace and control almost the entire output of nearly all the mines in Virginia, Kentucky, Tennessee, Geor-gia, and Alabama, the total value of which is nearly \$50,000,000 and this is to be the capital stock of the organiza-

This movement was started months

This movement was started months ago and lately several meetings have been held, the lass one at Lookout Mountain two days ago. For more than a year price on coal and coke have been going down and down, until coke is now being manufactured and coal mined at a dead loss to the companies. Every mine and every coal dealer has put its product on the market at whatever figure it could bring. It is to establish a standard of prices that the combine is to be formed. In short, the purpose of the organization is to advance the price of coal to all consumers, but especially to manufacturers, 25 per cent.

There were nearly thirty representatives of the big mines at the meeting on the mountain. Altogether the combine will include seven-eights of the e.gal mining interests of the soc. In and represent millions of dollars. The mines interested are located in what is known as the seven chief mining districts of the south. At present there are no officers except Mr. Pratt of the Jollico mines who was made temporary president until the permanent officers are named. One effect of the demoralization in the price of coal has been a gradual decrease in the wages of miners, until the scale of wages is now lower than it was ever known to be in the mining districts.

The coal men claim that if the

of St. Mark's hospital, where he died at 12 o'clock on Sunday night.

The case has been one of unusual interest to the staff of physicians and surgeons at St. Mark's, and many of the leading doctors of the city visited the institution to see the patient. The diagnoses differed widely, and in order to clear up the mystery, it was determined to hold an autopsy, which was performed at O'Donneil's undertaking establishment yesterday by Dr. Beatty, Dr. Behl, resident physician at the hospital and Dr. Bower.

Eighteen months ago Doctman was a stout man, weighing 180 pounds, but after his illness commenced he seemed to decline and steadily decreased it, weight until at the time of his death is was simply a skeleton, weighing as more than forty pounds. The patient had all the advantages of a first-class hospital, and all the aid that modern science and skilled grysicians could give him, but it availed nothing, Doctman steadily grew worse, and his skin which at first turned to the whiteness of chalk, later became of a justreless bronze appear ance where his garmetris chaled him libe mucous membrane of the mouth, yet and guins had the same bronze.
